

OCALA OCCURENCES

Odd Fellows meet tonight.

Masons meet Thursday evening.

Robert Martin remains in jail. It is the opinion of Sheriff Galloway that the young man is demented.

Secretary Rooney and a number of other citizens attended the picnic at Anthony today.

Capt. Fred Priest of Palatka was visiting his Ocala friends yesterday.

Mr. J. G. Kichline, the Eastlake merchant, spent Monday and some of his loose change in Ocala.

Mr. Fount Caldwell, a prominent citizen of Jasper, is visiting friends in the city.

W. K. Lane, M. D., Physician and Surgeon, specialist Eye, Ear, Nose and Throat. Law Library Building, Ocala, Florida.

Mr. William Bullock is in Jacksonville for a short business trip.

Mr. Edward Tucker has returned from a hasty business trip to Jacksonville.

Have you tried those delicious Maxie cherries? 50 cents per pound, at Gerig's.

Miss Susan Cassels of Plant City, who is here on a visit to her brother, Prof. W. H. Cassels for the benefit of her health, is greatly improved.

A new line of high grade stationery in all the latest styles and cuts at Gerig's.

Mr. S. H. Kelley, of Jacksonville, with the Maxwell Motor Sales Corporation, was in town today, calling on the Maxwell agent for Marion county.

Mr. and Mrs. Jesse G. Meadows, of Reddick, are in the city today on a shopping tour. Mr. Meadows has resigned his position with the Reddick Cold Storage Company to accept one with the Kendig groves just west of Lowell, where he will make his future home.

The Sparr schools opened yesterday with the best attendance they have ever had on the opening day. Miss Josie Parrish, of Lake Butler, is principal; and Miss Grace Browning, of Dade City assistant. The outlook for a most successful term is fine.

Mr. J. H. Johnson will soon leave for a well-earned vacation at his old home in Asheville, and while absent will visit other points in North Carolina. He will return in November.

James B. Haney of Ocala has recently rented through the agency of J. E. D. Graves the Hubbell cottage on North Atlantic avenue, which he will occupy for an indefinite length of time. Seabreeze item in Daytona Journal.

The coroner's jury at Romeo has rendered a decision that Cribbs, Homer Dean's slayer, is guilty of manslaughter. Officials here say that this finding of the jury is irregular, that it could only decide what caused Dean's death without fixing the gravity of the offense. Cribbs has not yet been caught.

Cecelia, the little daughter of Mr. Peter Loos, a farmer living near Ocala, stepped on a piece of broken glass this morning and cut her foot severely. She was brought to town and had the wound dressed, beside which the doctors gave her tetanus anti-toxin.

Prof. E. H. Miller, principal of the McIntosh school, is among the strangers in town today. He is arranging for the opening of his school on Monday, September 20th.

Mr. R. C. Scott, proprietor of the Ortega Kennels, at Jacksonville, arrived in Ocala yesterday with several of his high bred dogs for exhibition. He is accompanied by Mr. James Hutchinson, also of the metropolis, and they came via the water route between Ocala and Jacksonville the entire way.

Another fresh shipment of Triola sweets just in at Gerig's.

Dr. Watt's Office is now in the Holder Block. Phone No. 7. 17-51.

WEATHER REPORT

This report is made from observations taken daily by Mr. F. G. B. Weihe, official observer for the government.

Local forecast

Fair tonight, Wednesday partly cloudy, probably showers north and central portions.

The Temple last night had a remarkably fine picture story in Harold MacGrath's "Carpet from Bagdad." It was remarkably well illustrated and was seen with great interest. The feature story for next Monday night will be Cyrus Townsend Brady's "Island of Regeneration." It is a most interesting story in the book, and doubly interesting on the picture screen. The Temple tonight will have the seventeenth episode of "The Exploits of Elaine," "A Hot Time in Punkville," a Lubin animated cartoon, and "The Inventor's Peril," a two reel Lubin drama, featuring Joseph Smiley and Lettie Lisle.

Elizabeth Fry.

Elizabeth Fry's great work for prison reform was all done after her marriage. It was in 1813 that she paid her first and memorable visit to Newgate prison, and in 1817 formed the Association for the Improvement of Female Prisoners in Newgate, which attracted such widespread interest. Her efforts were not confined to Great Britain, many continental prisons being the better for her labors.

PRACTICAL HEALTH HINT.

After Effects of Typhoid.
A study of 1,574 cases of typhoid fever shows that 146 died while under treatment, which is not quite one out of every ten. Of the 1,428 who recovered from the immediate effects of the disease the death rate for the first three years was nearly twice the normal death rate of a similar group of persons who had not had typhoid. As the cause of death among the patients who died following recovery from typhoid, tuberculosis heads the list, with a rate of 39 per cent; with diseases of the heart following, with a rate of 14.8 per cent. In other words, the chances for having tuberculosis are increased about three times in those who have recovered from typhoid, while the chances for heart diseases are about doubled. In the United States each year 8,000 deaths occur among persons who have recovered from an attack of typhoid fever, but who, as a result of impaired vitality from the disease, succumb during the first or second year after recovery. Besides lowering the vitality so that other diseases are not to be resisted, typhoid often leaves the patient maimed for life, and memory is frequently impaired. These considerations should bear an especial appeal to those who still tolerate flies and fly infested food and who have not yet made up their minds to be vaccinated against typhoid.

FINE OFFER FROM PHILLIPS

For Good Exhibits at the Marion County Fair

Ocala, Fla., July 31, 1915.
A. C. Cobb, Secretary Marion County Fair Association, Ocala, Fla.

Dear Sir: I will give a \$10 gold piece to the man or boy in Marion county who exhibits at the fair in November the best 100 ears of corn, and to the woman or girl who exhibits at the fair in November the best 50 ears of assorted vegetables put up by herself, with the understanding I am to get the exhibit of corn and vegetables on payment of this premium. This is 10c. per ear for the corn and 20c. per can for the vegetables.

Yours truly,
J. P. Phillips.

LIGHTS FOR BATTLEFIELDS.

Our Army Officials Are Making a Study of the Newest Devices.

The secretary of war has directed the engineer corps of the United States army to make an exhaustive study of searchlights, flares, star bombs, and such other lights as the Europeans are now using in war.

According to the Army and Navy Journal, searchlights are for obvious reasons kept dark until the field artillery has ceased firing and the enemy is charging. To illuminate a field over which the enemy is to advance, star bombs and flares are also used.

Flares, which are merely modified fireworks, are like the familiar red, white and blue lights used in Fourth of July celebrations to illuminate streets and parks. Sappers go out in front of the trenches with flares, which are then connected with the headquarters of the officers in command of the first line, who by setting them off at intervals throughout the night keep the battle front continually lighted.

Star bombs are also adaptations of modern fireworks. They are shot from mortars into the sky, where for twenty minutes they will give off an intense light over a wide circle of the surrounding country. Before one bomb dies out another is shot into the air. A kind of star bomb, shot into the sky like an ordinary rocket, is used by both armies for signaling at night.

It is with such lights as these that our own engineer corps is now conducting experiments at the barracks in Washington.

Where Steadiness Is Requisite.

A steady hand in military affairs is more requisite than in peace, because an error committed in war may prove irreparable.

UNCLASSIFIED ADS

WANTED, LOST, FOUND, FOR SALE, FOR RENT AND SIMILAR LOCAL NEEDS

WANTED—From 1 to 100 head of hogs to fatten on shares, or by the month at 80c per head. Every precaution will be used to keep hogs in a healthy condition. W. B. Perry, Oxford, Fla. 8-16-26t.

FOR RENT—A splendid home property, comparatively new, at corner of South Ninth street and Orange avenue; two blocks from high school building; furnished or unfurnished; will give two years' lease if desired. Rent reasonable. Address Robert H. Sanders, Ocala, Fla. 14-tf.

FURNISHED RESIDENCE FOR RENT—An eight-room residence, every modern convenience and fully furnished in every particular. Pleasant surroundings and close to public square. Would not rent for less than six months. Apply at Star office 17-tf.

FOR RENT—Well located and nicely furnished rooms in residence next to the Colonial; also for light housekeeping. Inquire at the Colonial. 7-tf.

FOR RENT—Five room cottage with modern improvements, four blocks from square; garage on premises. Apply to Geo. J. Blitch. 8-11-6t.

FOR RENT—Three rooms furnished for light housekeeping; lights and water free; or two rooms for \$12 per month; three rooms for \$15 per month. Fine location on South Third street. Inquire at Star office. 10-12t.

NEAR DEATH BY SMOTHERING

But Husband, With Aid of Cardui, Effects Her Deliverance.

Draper, N. C.—Mrs. Helen Dalton, of this place, says: "I suffered for years, with pains in my left side, and would often almost smother to death."

Medicines patched me up for awhile but then I would get worse again. Finally, my husband decided he wanted me to try Cardui, the woman's tonic, so he bought me a bottle and I began using it. It did me more good than all the medicines I had taken.

I have induced many of my friends to try Cardui, and they all say they have been benefited by its use. There never has been, and never will be, a medicine to compare with Cardui. I believe it is a good medicine for all womanly troubles.

For over 50 years, Cardui has been relieving woman's sufferings and building weak women up to health and strength.

If you are a woman, give it a fair trial. It should surely help you, as it has a million others.

Get a bottle of Cardui to-day.
Write to: Chattanooga Medicine Co., Ladies' Advisory Dept., Chattanooga, Tenn., for special instructions and a free booklet, "Hints for Treatment of Women," in plain wrapper. N.C. 156

SNAPSHOTS OF NOTABLE PERSONS

Count Cadorna, Italian Commander in Chief.

Photo by American Press Association.

Count Luigi Cadorna, commander in chief of the Italian armies now operating against the Austrians, was born and reared in a military atmosphere. He was born sixty-five years ago in Piedmont, the most martial of the Italian provinces. His ancestors were soldiers.

He began his military education at the age of ten, when he entered the military school at Milan, continuing his studies five years later at the military academy at Turin. At seventeen he was made a sublieutenant on the general staff and began a course at the School of War. At twenty-five he was a captain and eight years later was given command of a regiment of infantry.

He reached the grade of general in 1898 and five years ago was made commander of an army corps. When the present war broke out last August he was raised to the post of commander in chief of the Italian army by King Victor Emmanuel and assigned the task of putting the army in war condition.

Count Cadorna married in 1881 the Marchioness Balbi. He has four children, a son and three daughters. Two of the latter are nuns, while the third is a writer. The son is an army officer.

England's Strong Man.

War, which always brings to the fore the strongest man or men in any nation, generally a military commander, has brought to the position of greatest power in Great Britain a civilian, David Lloyd-George, formerly chancellor of the exchequer, but now minister of munitions in the new coalition cabinet. This post gave him almost dictatorial authority in providing for an industrial army to manufacture cannon and ammunition for the armies in the field. That he was the man for the place has been proved by the enrollment of more than 100,000 workmen in the munitions army. Also he showed his great power when he pre-

Photo by American Press Association.

DAVID LLOYD-GEORGE.

valued upon 200,000 striking coal miners in Wales to return to their labor of supplying coal to the British fleet.

Lloyd-George has hated war and opposed with all his force the doctrine of militarism, but all these personal opinions were thrown aside last August when England cast her voice for war. As minister of munitions Lloyd-George has been empowered to enroll workmen and to exact of them a discipline almost as severe as that maintained in the army. He was also given power to limit the profits of the factory owners and master workmen.

David Lloyd-George is of Welsh parentage. He was born in Manchester, England, in 1863, but was educated in Wales. He chose the law for a profession and is a solicitor of great ability. Since 1890 he has been a member of parliament from Carnarvon. He served as chancellor of the exchequer since 1908.

British Marriage Statistics.
In every 1,000 marriages solemnized in Great Britain 21 are between first cousins. Among the nobility the rate is much higher, amounting to 45 in 1,000.

A WONDROUS LAND

The Yellowstone Region as James Bridger Saw It.

AND HE WAS A TRUTHFUL MAN

His Adventure With an Elk at the Famous Obsidian Cliff and the Effect of a Ride Through Alum Creek—Story of the Mountain That Was Cursed.

As a teller of tales Munchausen had a worthy rival in James Bridger, the celebrated hunter, trader and guide, whose name and career are part of the pioneer history of the west. Bridger was thoroughly familiar with the region now comprised in the Yellowstone park as far back as 1830.

In his book, "The Yellowstone Park," the author, Hiram Martin Chittenden, brigadier general United States army, retired, sets down some of the yarns Bridger told about that land of wonders. Many of the Yellowstone country tales ascribed to Bridger have survived to this day, probably because they have never been capped. The first story General Chittenden tells relates to the celebrated Obsidian cliff, a mass of black volcanic glass with which all the tourists are familiar. Its discovery by Bridger was the result of a hunting trip, and it happened in this way:

"Coming one day in sight of a magnificent elk, he took careful aim at the unsuspecting animal and fired. To his amazement the elk not only was not wounded, but seemed not to have heard the noise of the rifle. Bridger drew considerably nearer and gave the elk the benefit of his most deliberate aim, but with the same result as before. A third and fourth effort met with similar fate. Utterly exasperated, he seized his rifle by the barrel, resolved to use it as a club, since it had failed as a firearm. Rushing madly toward the elk, he suddenly crashed into an immovable vertical wall which proved to be a mountain of perfectly transparent glass, on the farther side of which, still in peaceful security, the elk was quietly grazing.

"Stranger still, the mountain was not only of pure glass, but was a perfect telescope lens, and, whereas the elk seemed but a few yards off, it was in reality twenty-five miles away."

Another of Bridger's discoveries was an ice cold spring near the summit of a lofty mountain, the water from which flowed down over a long, smooth slope, where it acquired such velocity that it was boiling hot when it reached the bottom. This, a later investigator of the Fiehole river found, was a case in which a hot spring discharged into the river bed.

Alum creek, a tributary of the Yellowstone, received its name from an accidental discovery by Bridger. One day he forded the creek and rode out several miles and back. He noticed that the return journey was only a small fraction of the distance going and that his horse's feet had shrunk to mere points which sank into the solid ground so that the animal could scarcely hobble along. Seeking the cause, he found it to be in the stringy qualities of the water, which was saturated with alum to such an extent that it had power to pucker distance itself.

Bridger also found a fine place to fish: "Somewhere along the shore an immense boiling spring discharges its overflow directly into the lake. The specific gravity of the water is less than that of the lake, owing to the expansive action of heat, and it floats in a stratum of three or four feet thick upon the cold water underneath. When Bridger was in need of fish it was to this place that he went. Through the hot upper stratum he let fall his bait to the subjacent habitable zone and, having hooked his victim, cooked him on the way out."

The visitor to the region of petrifications in the northeast corner of the park and to various points in the hot springs districts will have no difficulty in discovering the base material out of which Bridger contrived the following picturesque yarn:

"A mountain in the park was once cursed by a great medicine man of the Crow nation. Everything on the mountain at the time of this dire event became instantly petrified and has remained so ever since. All forms of life are standing about in stone where they were suddenly caught by the petrifying influences, even as the inhabitants of ancient Pompeii were surprised by the ashes of Vesuvius. Sagebrush, grass, prairie fowls, antelope, elk and bears may there be seen as perfect as in actual life. Dashing torrents and the spray mist from them stand forth in arrested motion as if carved from rock by a sculptor's chisel. Even flowers are blooming in colors of crystal, and birds soar with wings spread in motionless flight, while the air floats with music and perfumes siliceous, and the sun and moon shine with petrified light!" It is denied, though, that Bridger was responsible for the story that even the laws of gravitation were petrified in the region.

Uncontrollable Curiosity.
"I don't see how it is that Mrs. Jorwig has so many friends. She gossips terribly."

"Yes," replied Miss Cayenne. "Everybody seems willing to take a chance on being talked about for the sake of hearing what she says about the others."—Washington Star.

There is only one sort of shabbiness that matters—a shabbiness of the soul.—Edwin Pugh.

OUR PUBLIC FORUM

IX—Peter Radford

On "Back to the Soil With Wall Street"

Photo by American Press Association.

When Wall Street wants good business men she usually goes back to the soil to get them. That financial thoroughfare is said to be honeycombed with men who have plowed barefooted, who have drunk branch water, eaten cornbread and molasses and slept on the floor in their early days. A man is more capable of holding the reins of business who knows how to drive a team of mules, shear a sheep or put a ring in a shoat's nose. A man is better equipped to meet the problems of life who in his youth has walked the log across the creek to get to school, courted the girls at husking bees and pitched horse shoes Saturday afternoon. A man who has spent the moonlight nights of his youth possum hunting, going to protracted meetings and occasionally turning down the community at a spelling match has the right sort of stuff in him to make a good business man. The active officials of most of the large business organizations of America it is said were, with a very few exceptions, raised on the farm, and could swim the creek, catch hay, chop wood, milk the cows or slop the hogs as easily as they can run world-wide business institutions.

The farmers look to these capable and loyal sons of the soil to assist in the solution of the business problems of agriculture. Wall Street is reputed to be capable of financing everything from a Y. M. C. A. to a war, so why not finance agriculture? It is not sufficient to lend money to a correspondent to lend to a local banker, to lend to a broker to lend to a merchant, to lend to the landlord to lend to a farmer. Such a financial system sounds like the house that Jack built, and is just about as useful. Neither is assistance complete when money is furnished buyers to "move the crop." What the farmer wants is money to hold the crop. What better security is there than a warehouse receipt for a bale of cotton, a sack of wheat or a bushel of corn and why will such securities not travel by the side of government bonds?

The American farmer is a capable plowman. He always has filled and always will fill the nation's granary, larder and wardrobe, but he has nothing to say in fixing the price of his products. The problem confronting the farmers of this nation today is marketing and its solution depends first upon the farmer organizing for concert of action and the co-operation of the financial interests in marketing the crop. Agriculture is the biggest business in America and the only one that has not a financial system adapted to its use.

WHERE SHALL I GO TO SCHOOL?

THE STATE UNIVERSITY
GAINESVILLE, FLORIDA

Highest standards, ranking with the largest and best Universities of the North and East.
387 students last session. Total enrollment 639, including summer school.
Tuition free, excepting \$20 per semester for law.
For further information address,
A. A. MURPHY, President.

FLORIDA STATE COLLEGE FOR WOMEN, TALLAHASSEE, FLA.

Standard the same as those of the best colleges and universities in the country.
Modern buildings and equipment; all modern conveniences.
473 students regular term; 161 summer term; total enrollment last session 636.
Tuition free in college and normal school.
For catalogue and information write,
EDWARD CONRAD, President.

THE DIAMOND FROM THE SKY

If you are interested in seeing a beautiful romantic story—full of heart, interest—if you enjoy excellent photography—stirring action—remarkable motion pictures—and a \$10,000.00 prize offer open to YOU—see Lottie Pickford in "The Diamond From The Sky" at leading theatres

\$10,000.00 for a Suggestion!

Read this story in this paper every Wednesday and Thursday afternoon and see the pictures Friday at the Temple Theater.

SANITARY SEWERAGE SYSTEM, OCALA, FLORIDA

Sealed proposals will be received by the city council of Ocala, Florida, at the office of the city clerk, for the construction of a sanitary sewerage system, until September 14th, 1915, at which time they will be opened and read publicly. The work includes the furnishing of all labor, material and machinery, and equipment of every kind necessary to construct the above work according to plans and specifications. The approximate quantities are as follows:

- 5788—6" sewer pipe.
- 101315—8" sewer pipe.
- 8145—10" sewer pipe.
- 2215—12" sewer pipe.
- 3480—15" sewer pipe.
- 260—18" sewer pipe.
- 237—Manholes.
- 51—Automatic Flush Tanks.
- 37—Hand Flush Tanks.
- Necessary Y Branches.
- 1—Sewerage Disposal System.

Each bid must be accompanied by a certified check on any state or national bank of Florida, or on a national bank of any other state for 5 per cent of the amount bid, drawn to the order of the president of the council, J. M. Meffert.

The bonds have been sold, and payments for work will be made in cash. It is the desire of the city council to let the contract as a whole to one contractor, but they reserve the right to segregate and let in sections if it be to the best interests of the city.

Plans and specifications may be seen at the office of the city clerk or the engineers. Bidding blanks may be obtained from the engineers or city clerk. Copies of plans and specifications may be obtained from the engineers at \$5 per set to cover their actual cost.

The right is reserved to reject any and all bids.
J. M. Meffert,
President City Council.
J. B. Sistrunk, City Clerk.

The J. B. McCrary Company, Engineers, 1408-17 Third National Bank Building, Atlanta, Ga. 8-9-5t-mon

Loyal to His City.
"I understand," said a visitor from Philadelphia to a friend in Boston, "that you have so high an opinion of your city that you think heaven must be like Boston." "Well," was the reply, with a shrug of the shoulders, "I believe I did say so some time ago, but you know Boston has improved a great deal in the last few years."—Birmingham Age-Herald.
